Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 22 March 2006.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 102

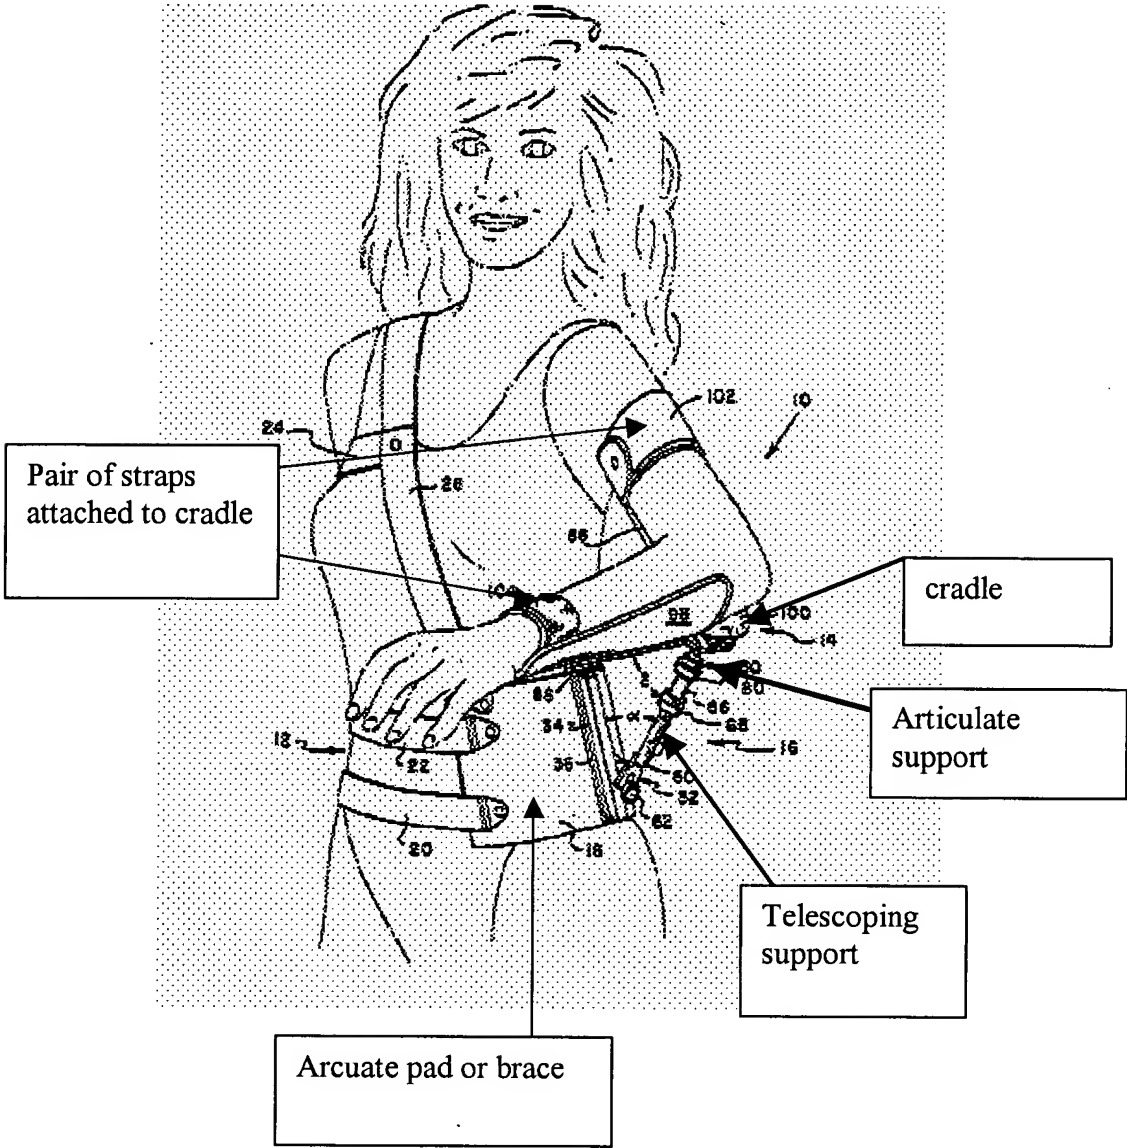

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

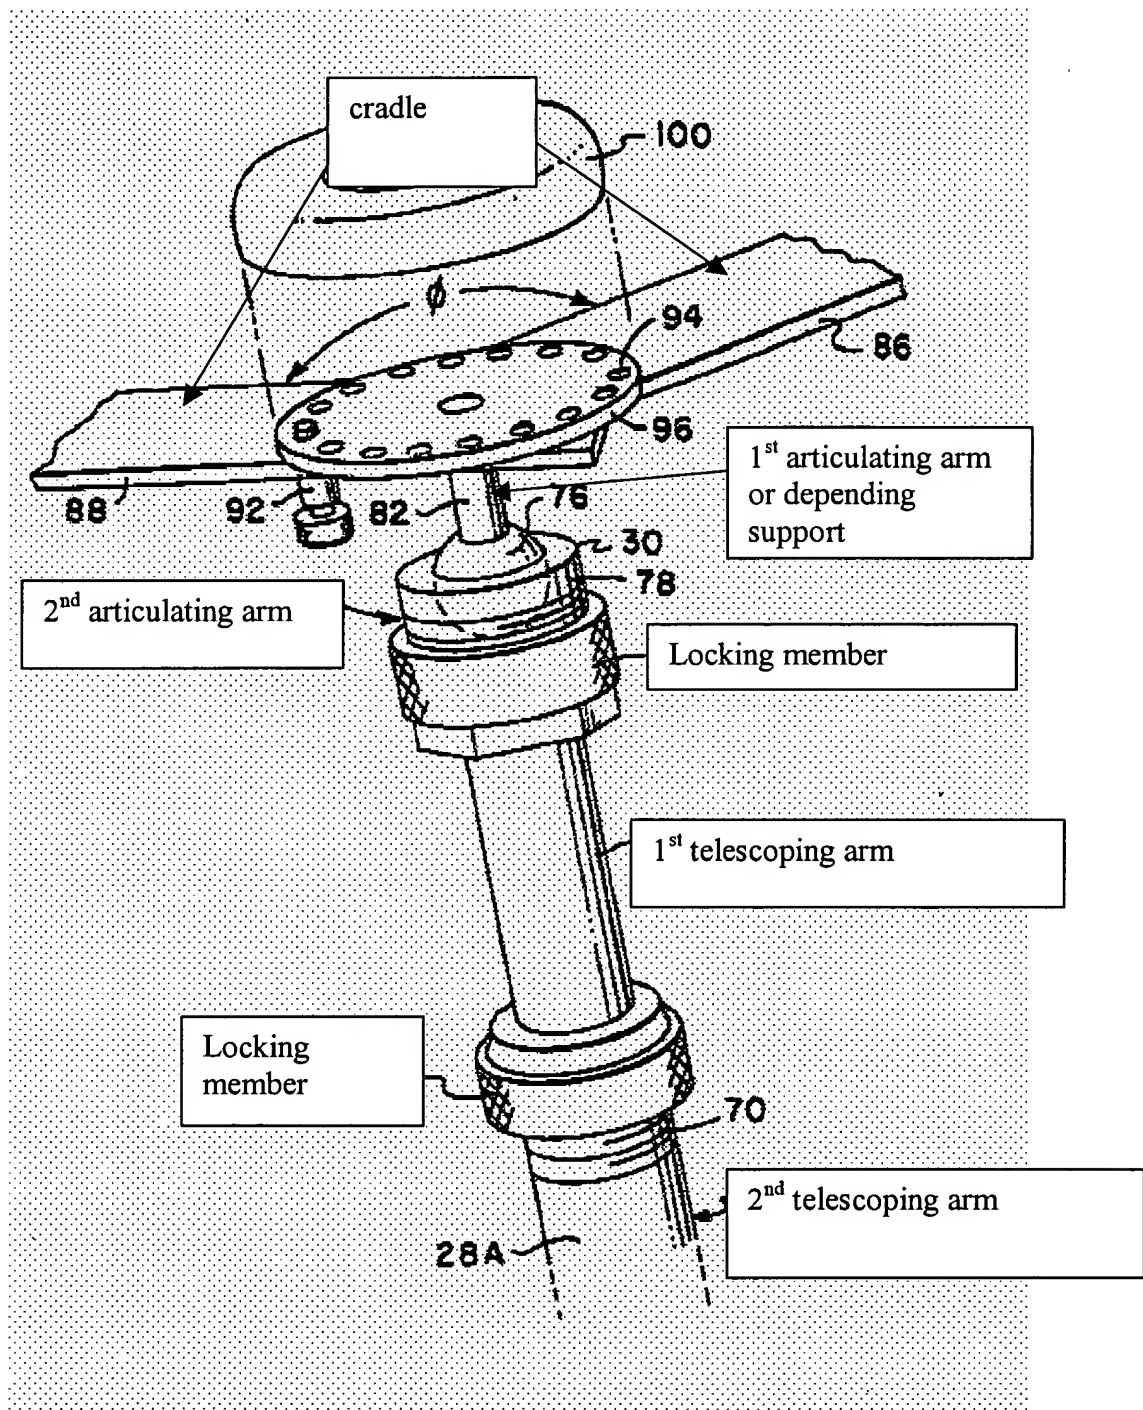

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 8 and 25-42 are rejected under 35 U.S.C. 102(b) as being anticipated by Burkhead et al (US patent no. 5,385,536). Burkhead discloses a support comprising all the claimed features of applicant's invention (see examiner's illustrations below).

Furthermore regarding applicant's intended use of a hunter holding a firearm and to allow the wrist and forearm to move relative to trunk of a person, Burkhead's support is inherently capable of such intended use. Applicant is reminded that a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim.

Response to Arguments

Applicant's arguments filed 3/22/2006 have been fully considered but they are not persuasive. Regarding applicant's argument to the limitation of the user, there is no objection to those limitation. Examiner has taken those limitation in the patentability analysis.

Regarding applicant's argument is that the entire Burkhead'536 patent focus on providing an orthopedic device that has a goal of immobilizing the patient's arm and shoulder and consequently does not show the user's wrist and forearm as being movable relative to the person's trunk. Applicant's device is also use to steady and immobilize the arm of a user during hunting. As stated on page 7 of applicant's specification, a user of applicant's device first attaches the strap to his arm or wrist and then locks the articulate joint into position, then the user places the support onto his torso then adjust the telescoping support depending on the size of the user then locks that in place. Thus, essentially keeping the aim steady by immobilizing the user. Similarly Burkhead's adjustable support apparatus performs the same way. The support is allowed to adjust so as to customize the support for a particular user and then locked in place to immobilize. Even though Burkhead's support is not for use with a hunter, in terms of patentability such intended use does not have patentability weight. A recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. In this case, Burkhead's adjustable support apparatus is capable of such intended use by a hunter.
